1658	Hot Fix	Dimension Conflict on Creating Change Order Quote	ProjectPro Basics

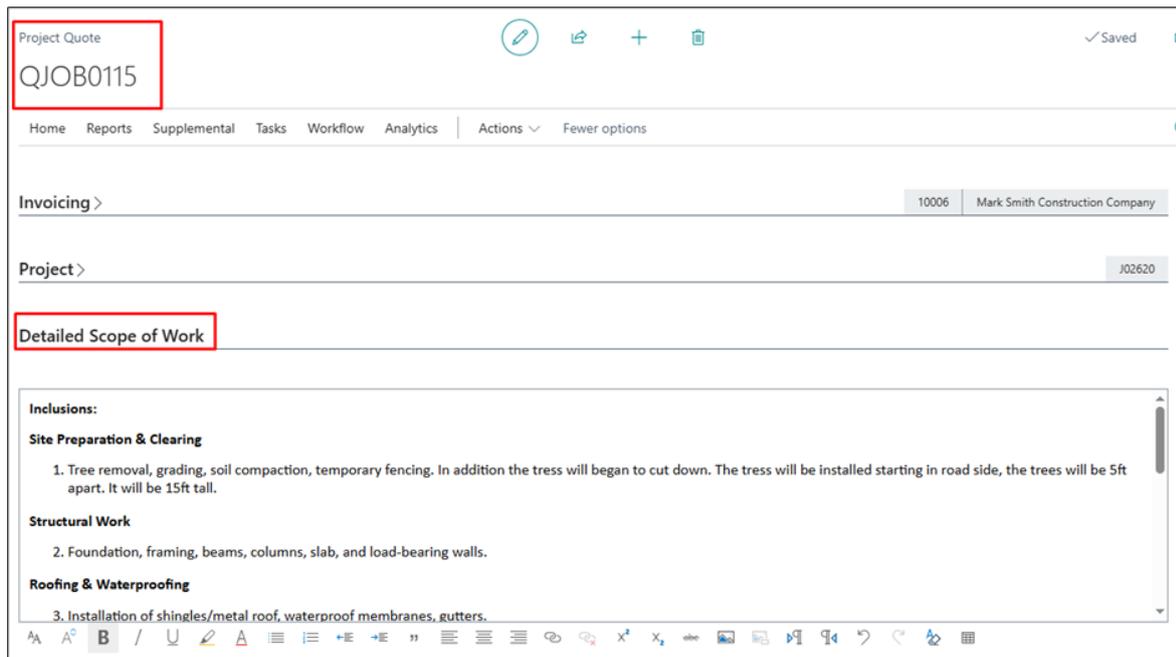

**Note: Details are given below in "Release Note Details".

Release Note Details

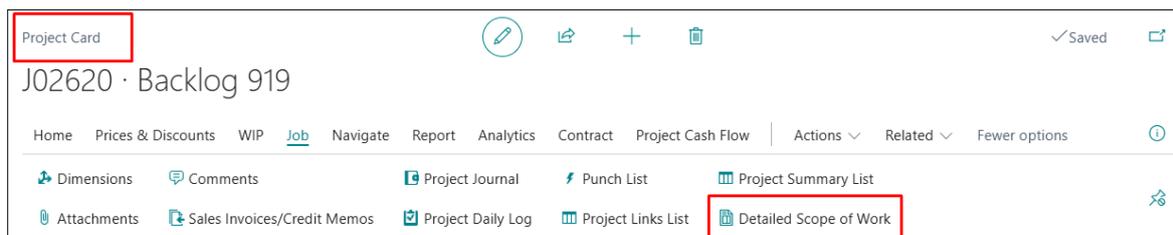

ADO-919

New Feature – Flow of "Detailed Scope of Work" to every Project Class's Project

The **Detailed Scope of Work** on the Quote card is automatically carried forward to the related Project card when converted from the quote.

It can be accessed on the Project from the "Detailed Scope of Work" action available under the Job section of the ribbon.

This behavior applies irrespective of project classes, ensuring consistent and uniform data flow across all project types.

Project Detailed Scope of Work

J02620 · Backlog 919

General

No.	J02620	Bill-to Customer No.	10006
Description	Backlog 919	Name	Mark Smith Construction Company

Detailed Scope of Work

Structural Work

2. Foundation, framing, beams, columns, slab, and load-bearing walls.

Roofing & Waterproofing

3. Installation of shingles/metal roof, waterproof membranes, gutters.

Exterior Finishes

4. Cladding, stucco, brickwork, exterior painting.

Interior Finishes

ADO-997

New Feature – VAT/Tax to be included in Prepayment Credit Memo

The Tax has been included in the case of the Prepayment Credit Memo. If the “Tax Liabile” is enabled on the project card, the system will prompt the user to determine whether tax can be included when posting a Prepayment Credit Memo.

Note: The “Tax Area Code” and “Tax Group Code” assigned on the Project card will flow to the Prepayment Invoice/Credit Memo.

ADO-1123

New Feature – Project No. Series on "Copy Project"

- The “Copy Project” function under the home section of the Projects list ribbon has been renamed to “ProjectPro Copy Project”.
 - The BC standard “Copy Project” can still be accessed from the Actions → Function section of the Projects list ribbon.
- A new option, “Project No. Series”, has been added to the ProjectPro Copy Project function.

ADO-1193

Enhancement – Enhance Commitment Report (14021491)

The following changes have been implemented in the “Project Commitment Report” available on the Subcontract card.

- Lines with blank data will no longer be printed.
- Commitment Report caption change to “Project Commitment Report”.
- **Vendor Total** is now displayed instead of **Total**.
- **Project Total** is now displayed instead of **Grand Total**.
- A **Report Total** is now shown at the end of the report.
- The report has been changed to landscape mode.

ADO-1215

Enhancement – "Project Task Totals" for "Contract" Project Class

The Project Task Totals now work on the project with Project Class as "Contract". Since this is the highest level of the project and no values or transactions are created under this project class, every project under this one is counted as a sub-level (including master projects). Hence, only the Sub-Level columns will show the values.

Earlier, this used to work only for the Master and the Sub-Level projects.

ADO-1122

New Feature – Project Card - Project Setup to default Project's Status to "Planning" instead of "Open".

A new Projects Setup "Enable Default Project Status to Planning" has been added to the General fast tab. If enabled, the default "Status" on the project card when created new, will be set to "Planning" instead of "Open".

To update the status from "Planning" to "Open", you can define mandatory fields that should be filled in on the project card to update the status.

To define the mandatory fields for the project card, go to Project Setup → Actions → Mandatory Fields Setup → Project Card.

The mandatory fields list can also be accessed from Global Search. On this, define the Table ID, Field ID, and enable the “Include” to mark it as mandatory.

Table ID	Field ID	Table Name	Field Name	Include
167	13	Project	Starting Date	<input checked="" type="checkbox"/>
167	14	Project	Ending Date	<input checked="" type="checkbox"/>
167	21	Project	Global Dimension 1 Code	<input type="checkbox"/>

ADO-1325

Enhancement – Quote Dimensions to Quote Tasks

Any changes/alterations to the dimensions on the Quote card will now be reflected in the Quote Task Lines, like what we have on Projects (BC standard).

This results in a pop-up confirmation message (Y/N) to update the dimension change to task lines.

ADO-1332

Enhancement – Progress Payment No. Series

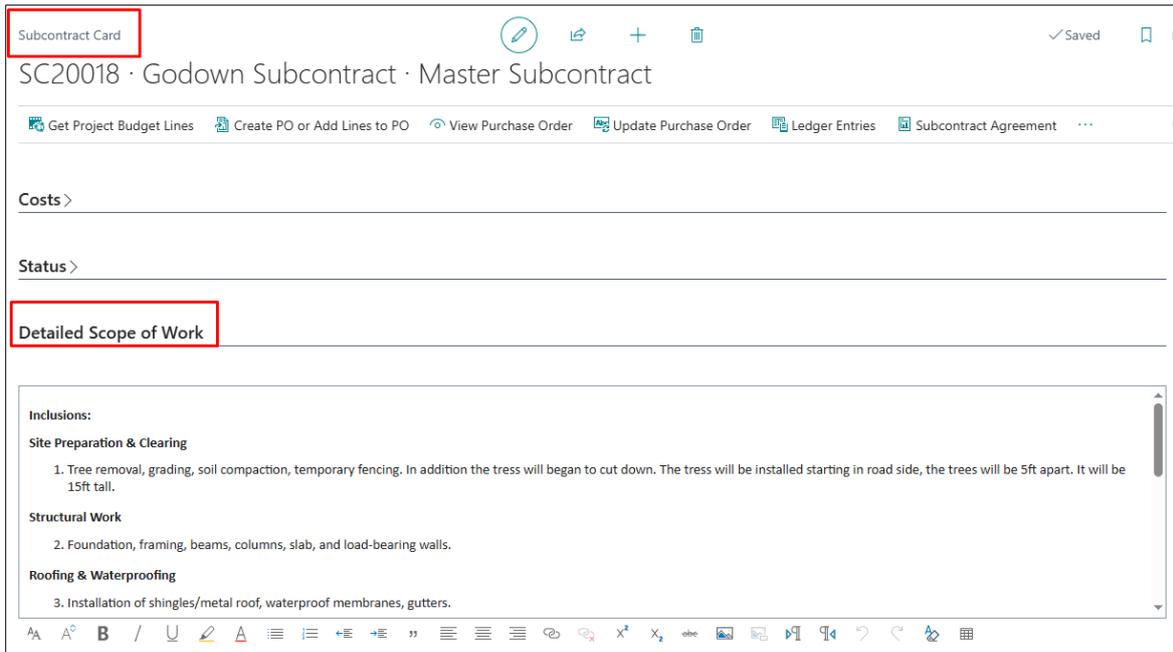

Earlier, a validation inherited from the base ProjectPro system restricted the creation of progress payments. Progress payments could only be created if manual numbering was enabled on the Subcontract Number Series.

The validation has now been removed. You can create progress payments regardless of manual numbering being enabled or disabled on the subcontract number series.

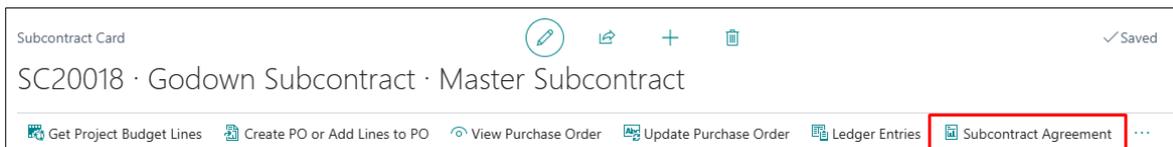

ADO-1373

New Feature – Add "Scope of Work" on Subcontracts and on the Subcontract Agreement Report

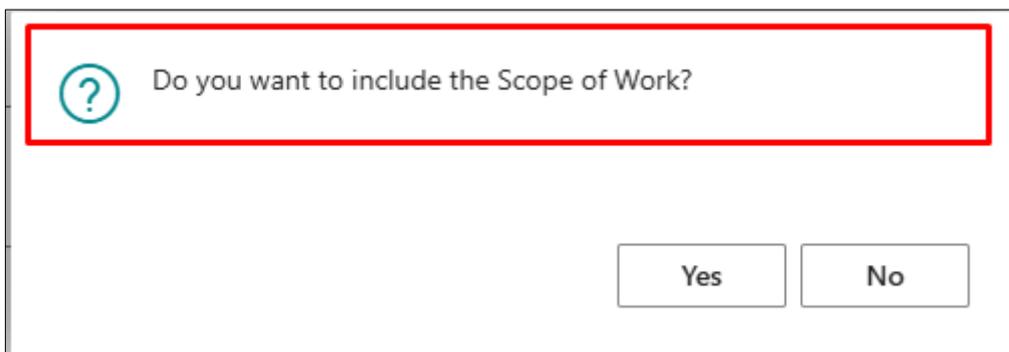

A new section, "Detailed Scope of Work", has been added to the Subcontract Card. This section allows you to enter and format free rich-text paragraph content, enabling clear and detailed documentation of the subcontract scope of work directly on the subcontract record.

The “Subcontract Agreement” report has been enhanced to support printing of the Detailed Scope of Work.

During report generation, the system now displays a confirmation pop-up prompting the user to choose whether the scope of work should be included in the printed agreement.

If selected Yes, the Detailed Scope of Work entered on the subcontract card is printed as part of the subcontract agreement. This provides flexibility while ensuring that scope details are included in the report only when required.

SUBCONTRACTOR AGREEMENT

- I. **The Parties.** This Subcontractor Agreement ("Agreement") SC20018 made on , is between:
- Contractor: ProjectPro UAT26 - NA with a mailing address of 1250 Pittsford Victor Road, Ste 310, Pittsford, NY 14534 ("Contractor"), and
- Subcontractor: United Rental with a mailing address of ("Subcontractor"), both of whom agree as follows:
- II. **The Client.** The Subcontractor acknowledges that any work performed under this Agreement must be in accordance with the latest version agreement(s) ("Prime Contract") made between the Contractor the Client known as:
- Client: Porter's Excavation with a mailing address of 125 Orchard Lane, Waverly, PA, 18856 ("Client").
- III. **Services Provided.** Subcontractor agrees to complete the following: Godown Subcontract ("Services").

Detailed Scope of Work

Inclusions:

Site Preparation & Clearing

Tree removal, grading, soil compaction, temporary fencing. In addition the tress will began to cut down. The tress will be installed starting in road side, the trees will be 5ft apart. It will be 15ft tall.

Structural Work

Foundation, framing, beams, columns, slab, and load-bearing walls.

Roofing & Waterproofing

Installation of shingles/metal roof, waterproof membranes, gutters.

Exterior Finishes

Cladding, stucco, brickwork, exterior painting.

Interior Finishes

Drywall, flooring (tiles/wood), ceilings, painting, and cabinetry.

ADO-1584

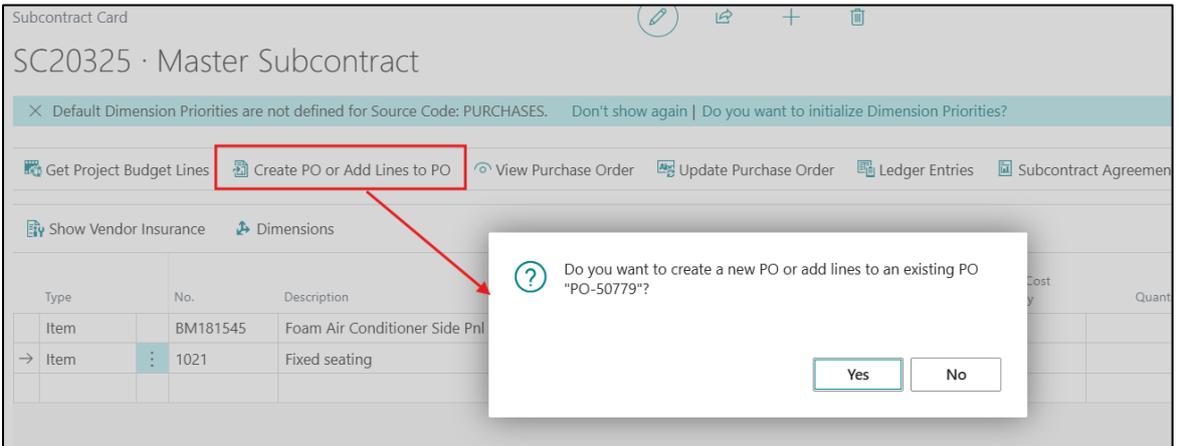

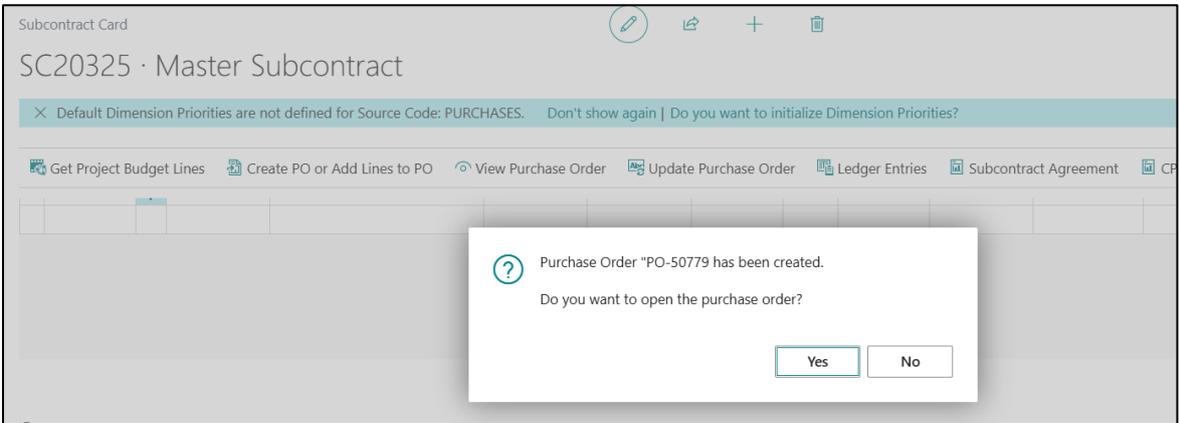

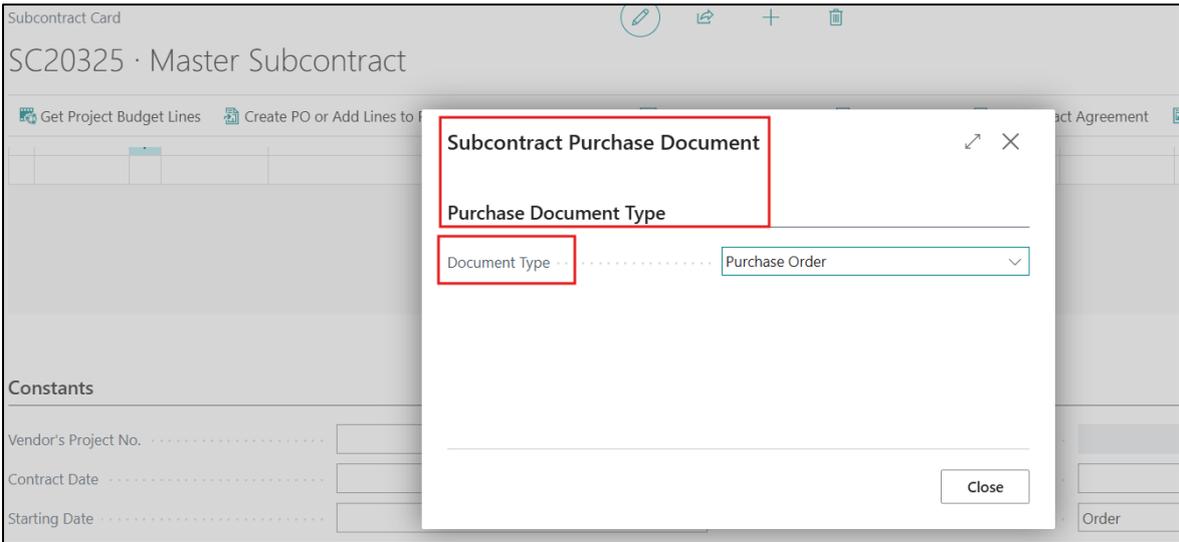

Enhancement – Increase Length of “Created By” Field in Cash Flow Worksheet

In the Cash Flow Worksheet, the “Created By” (username) field had a character length limitation, which caused the Cash Flow Worksheet to run. The length of the field has now increased.

ADO-1530

Enhancement – Subcontract Process Flow Messages Enhancements

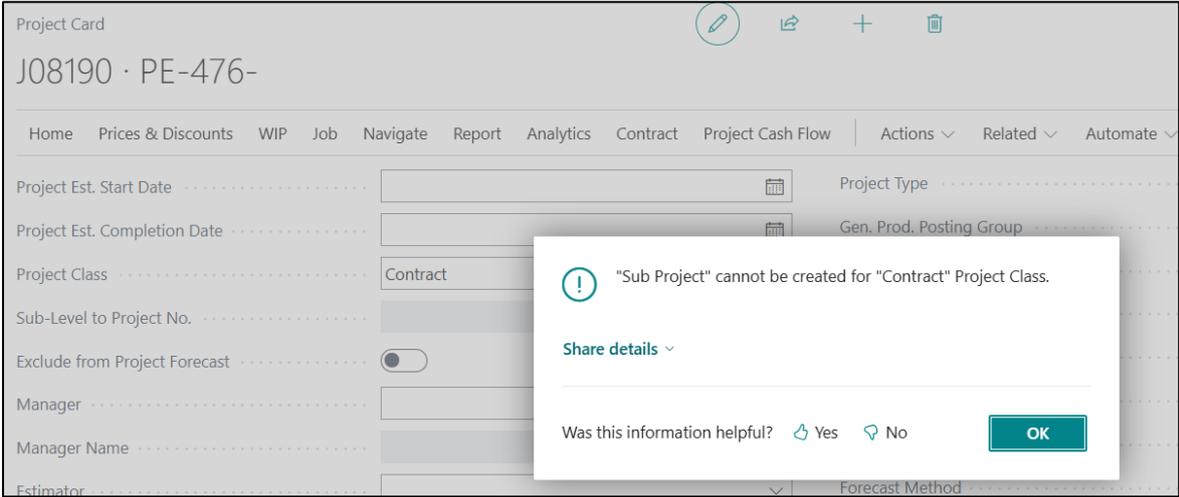

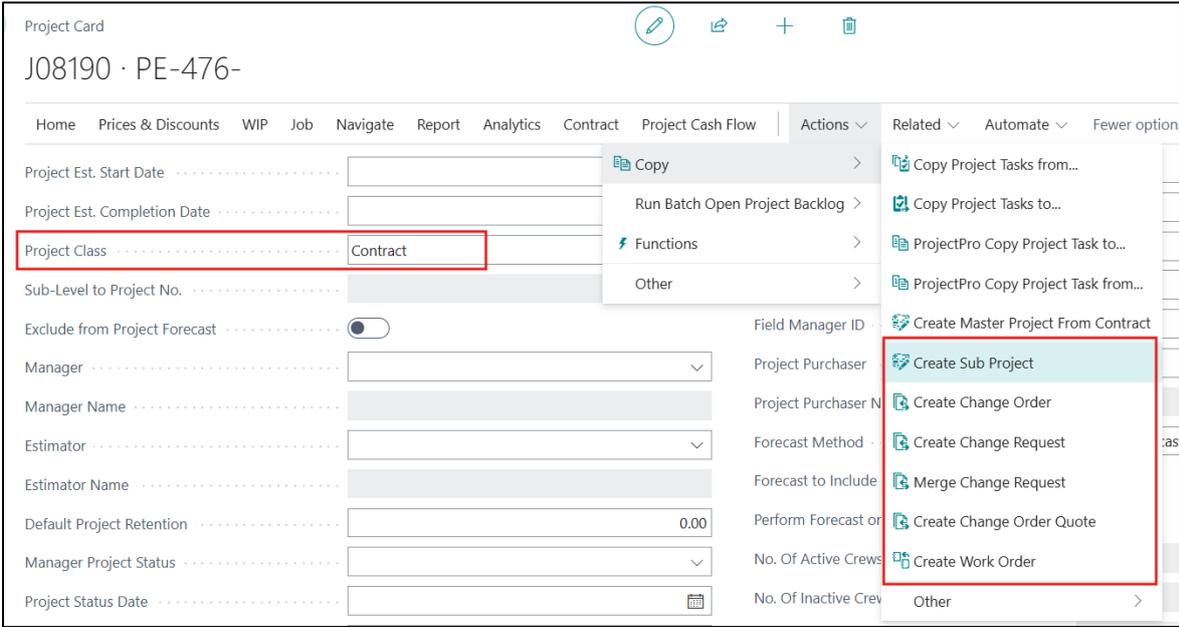

Various messages and captions in the Subcontract process have been enhanced.

ADO-1615

Enhancement – Creation of Sub-Level Projects (Non-Master) from Contract Project

Different error messages have been added to the Contract project when you try to create a sub-level project apart from the Master project, see the sample below. This ensures that only the Master project can be created from the Contract project.

Additionally, the system also restricts you to manually select the Contract project in the “Sub-Level to Project” field if the Project Class is not a Master project.

ADO-1206

Improvement – PFW Values must not copy from the Project to its Sub-Level

The values from the “PFW Forecasted Completed Cost” and “Override Forecasted Completed Cost” fields present on the Project Task Lines now will not get copied to any of the sub-levels.

J00470 - Building Construction ✓ Saved

ADO-1214

Improvement – Copy Project Function and Sub-Level to Project No.

The “ProjectPro Copy Project” function now will not copy the “Sub-Level to Project No.” field to the destination project. For this, this will notify you to enter the value manually in case of a sub-level project being created that requires a parent project to be tagged.

ADO-1329

Improvement – Flow of "Draw No." from Subcontract Commitment PO to Progress Payment

The Subcontractor Progress Payment process has been updated to preserve the “Draw No.” from the Subcontract Commitment. When the progress payment process is executed, the system no longer clears Draw No. automatically.

Subcontract Commitment

PO-50263 · AT&T Phone Service

General

No.	SCJOB0040	Round Amounts	<input checked="" type="checkbox"/>
Requisition No.	1	Final	<input type="checkbox"/>
Version No.	0	Owner Contact Type (Obsolete)	Owner
Subcontract No.	SCJOB0040	Owner Contact Code	
Subcontract Name		Arch Eng Contact Type (Obsolete)	Architect/Engineer
Project No.	J00020	Arch Eng Contact Code	
Project Name	Building Construction 110	Status	Open
Subcontract Draw No.	J00020-001	Retention Reduction Invoice	<input checked="" type="checkbox"/>
Vendor No.	10002	Requisition Date	1/20/2026

With this change, Draw No. remains unchanged on the Subcontract Commitment and can be updated manually by the user, if required, before posting the invoice to the vendor.

ADO-1090

Hot Fix – Dimensions Conflict on Subcontract

The conflict with project task lines tagged with Shortcut Dimensions and using those tasks on Subcontract lines has been resolved in the following cases:

- Subcontracts created through the Project card/list.
- Subcontracts are created directly from the Subcontracts list.
- Lines added to Subcontract using “Get Project Budget Lines.”
- Lines added manually to the Subcontract.

Additionally, the flow of dimensions from the Subcontract card to the Subcontract Commitment is also in place.

ADO-1382

Improvement – PFW – Total Budget Remaining and Forecasted Variance

The total value of the “Total Budget Remaining” and “Total Forecasted Variance” present on the PFW now gets calculated correctly even when the “Forecast to Include Sub-Level” is disabled on the project card.

Project No. T	Project Task No. T	Budgeted Costs	Total Costs Used	Budget Remaining	Budget Percentage Used	Override Forecasted Completed Cost	Previous Forecasted Variance	New Status Date	New Total Units Complete	New Total Percent Complete	Estimated Cost To Complete	Forecasted Completed Cost	Hours To Finish

ADO-1460

Improvement – Flow of "Project Task Type" and "Totaling" to Project Task Lines from Project Activities

The "Project Task Type" and "Totaling" field values now flow to the Project Task Lines from the Project Activities list.

ADO-1596

Improvement – PO with Negative Quantity and Payment Terms Code

While posting a multiple-line Purchase Order (PO) with one of them having a negative (-ve) quantity, the system made an error under the following conditions. These have been resolved now.

- PO contained a Payment Method Code with Bal. Account No.
- The negative quantity line is taken as the last line in the PO.

ADO-1512

Improvement – Project Journal – Unable to post 0 Price Lines

The Standard BC allows you to post the Project Journal entry with 0 Cost and Price. Earlier, ProjectPro allowed you to post a project journal entry only with 0 Cost, but not with both Cost and Price as 0. This is now feasible in ProjectPro as well, just like the Standard BC.

ADO-1658

Hot Fix – Dimension Conflict on Creating Change Order Quote

If the dimensions were already present on the Customer card and Project card, the system gave an error while creating a “Change Order Quote” from the Project card.

The dimension flow logic has been corrected as follows:

- Priority is given to the Project Card dimensions. If dimensions exist on the Project Card, those dimensions are used while creating the Change Order Quote.
